Author of Frinciples of Geology.

I vol. 8vo. 8vo pages. Suth Edition, Greatly Enlarged, and libstrated with 779 Woodcats. Price, \$4.50.

The last, or 6th edition of this work, was published in February, 1855, so that nearly ten years have since elapsed. In the interval since 1855, I have published several supplements to the "Elements," the contents of which are now incorporated in this work. This and other new matter, illustrated by more than 50 new wood-cuts, has added 120 pages to the volume, which has thus outgrown the dimensions usually assigned to a manual. I have therefore restored to the book its original title of "The Elements of Geology," under which name it first appeared in 1838, when it consisted of an expansion of the fourth book of my "Principles of Geology," which st that time had reached a fifth edition.—Extract from Preface.
